## **ABPI's Statement on Law No. 15,122/2025 and Decree No. 12,551/2025**

On July 23, 2025, the Brazilian Intellectual Property Association (ABPI) issued a technical statement regarding the regulation of Law No. 15,122/2025, enacted through Decree No. 12,551/2025, which provides for the potential adoption of trade retaliation measures, including the suspension of intellectual property rights, in response to trade barriers imposed by other countries. In its statement, ABPI strongly recommended that Brazil refrain from adopting the suspension of IP rights as a retaliatory measure, emphasizing the potential risks to legal certainty, compliance with international commitments, and the preservation of an institutional environment conducive to innovation and investment.
